

Sales power curve

The power curve data are valid for standard conditions of 15° Celsius air temperature, 1013 mBar air pressure and 1.225 kg/m³ air density, clean rotor blades, and horizontal, undisturbed air flow.

Nacelle arrangement

- | | |
|--------------------|-------------------------------|
| 1. Spinner | 10. Coupling |
| 2. Spinner bracket | 11. Generator |
| 3. Blade | 12. Service coupling |
| 4. Pitch bearing | 13. Meteorological anemometer |
| 5. Rotor hub | 14. Tower |
| 6. Main bearing | 15. Yaw ring |
| 7. Main shaft | 16. Yaw gear |
| 8. Gearbox | 17. Nacelle bearing |
| 9. Brake disc | 18. Oil filter |
| | 19. Canopy |
| | 20. Generator |
